

Port Sassnitz-Mukran e.V.

About us:

The Port Sassnitz Mukran maritime network was founded at the end of October 2010. The association views itself as the link between the companies based at the port and their partners.

The association members are regional, national and international companies operating in the following sectors:

- transport & logistics
- engineering & technical services
- offshore
- temporary employment agencies
- industry-oriented and maritime services
- real estate & property services
- legal advice & financial services

We would like to invite you to become actively involved in the Port Sassnitz-Mukran association. Membership of the association is open to all who have an economic or personal interest in developing the Sassnitz-Mukran business site.

It goes without saying that the association also provides many different opportunities for sponsors to be involved in national and international events through their corporate presence.

Our goals:

We as an association aim to promote the maritime site called the "Sassnitz-Mukran-Lietzow industrial park", coordinate common economic interests, support the exchange of information among all those involved and prepare unified marketing for the site. The professionalism of each individual in the development process of the port and industrial site and the reliability of our business partners are extremely important for us.

Our goals are to provide:

- a network and a contact point for companies operating in the manufacturing, services and logistics sectors
- synergies by transferring knowledge based on the wide variety of economic sectors
- a lobby group and reference persons for business contacts
- ideas for new cross-company projects and support in introducing them
- cooperation with centres of competence and an active discussion culture at a business, administration and political level
- a polished profile for the site and support for the core areas of expertise at the business location
- public relations work, lobbying and communicating the image of the site

The business site:

The large Sassnitz-Mukran-Lietzow business site is one of the most important economic centres in the German state of Mecklenburg-Vorpommern. Its business and industrial parks,

its special space in the core port area and services and logistics areas at the station form the basis for its high degree of competitiveness. The total site covers an area measuring approx. 170 hectares of useful space for companies operating in the commerce or industrial sectors.

The site combines the logistics benefits of a railway junction and an international seaport, and this provides effective and sustainable transport and logistics chains for customers from a wide variety of industrial sectors. The efficient infrastructure and superstructure available at the site and the high-performance port economy with its wide range of different seaport services "round the clock" make Sassnitz-Mukran the ideal transshipment centre.
